

PATRICK YOUNGER
Designer/Drafter

Hunt Engineering Services Inc.

Years of Experience: 17
Years with Hunt Engineering 10

Education

Associate of Applied Science, Computer Aided Drafting
ITT Technical Institute

Professional Experience

Mr. Younger is highly experienced in producing quality construction documents. Patrick's experience in design, as well as production, results in documents that are created with a clear understanding of what information is needed to be conveyed on the drawings. Prior to Patrick's 17 years experience in design and CAD work, he was involved in plumbing and residential construction. With this experience he is very affective in the design of light commercial projects.

Patrick is highly experienced in managing the many details required in the production of quality engineered documents. In addition to managing the various CAD standards from different clients, he is very skilled in working to finalize the details of the systems designs with the many other building components including: structural systems, ceiling systems and general building construction details. His conscientious work in each design he is involved in is reflected in the final product of the building construction.

Technical systems Mr. Younger is experienced in include: mechanical, plumbing and electrical design; field work; CAD production; record drawings; HVAC calculations, lighting software and electrical load calculations.

Representative projects:

First Step Building: 6,000 SF, two story facility with day care on the lower level and offices on the upper floor; Design and production of mechanical, plumbing and electrical systems. Sequim WA.

Elk Creek Apartment Complex: 160 unit apartment complex. Complete plumbing system design and production. Sequim WA.

Greenwood Town Center 52,000 square feet, mixed use Facility with retail on the lower floor and apartments above. Complete plumbing System design and production. Seattle WA.
